TITLE	Public Elementary and Secondary School Revenues and Current Expenditures for Fiscal Year 1985: Final Tabulations, Revised. E.D. Tabs.
INSTITUTION	Center for Education Statistics (OERI/ED), Washington, DC.
REPORT NO	CS-88-036
PUB DATE	Mar 88
NOTE	11p.
PUB TYPE	Statistical Data (110)
EDRS PRICE	MF01/PC01 Plus Postage.
DESCRIPTORS	Ancillary School Services; Average Daily Attendance; *Budgets; *Educational Finance; Elementary Schools; Elementary Secondary Education; Enrollment; *Expenditure per Student; *Public Schools; Secondary Schools; *State Federal Aid; State Surveys

ABSTRACT

This report presents final data on public elementary and secondary school revenues, expenditures, average daily attendance, and student membership for the 1984-85 fiscal year. It includes revenues by local, State, intermediate, and Federal sources and current expenditures by the categories of instruction, support service, and noninstructional services. Average daily attendance and student membership are shown as reported by the State education agencies from their administrative records. Financial figures for 50 states and the District of Columbia are listed in charts displaying their revenue sources, distribution by source, expenditures by function, and per pupil expenditure. (JD)

Highlights

Total revenues from all sources for fiscal year 1985 exceeded $137 billion (table 1 and figure 1). Approximately one-half (48.9 percent) of the revenues for education came from State sources, 44.4 percent from local and intermediate sources, and 6.6 percent from Federal sources.

- Local revenues ranged from a low of 12.3 percent of total revenues for New Mexico to a high of 90.1 percent for New Hampshire (table 2). (Excludes data for Hawaii.)
- State revenues ranged from a low of 5 percent of total revenues for New Hampshire to a high of 75 percent for New Mexico. (Excludes data for Hawaii and the District of Columbia.)
- Federal revenues ranged from a low of 3.3 percent of total revenues for Wyoming to a high of 16.5 percent for Mississippi.

Nationally, 60.9 percent of total current expenditures for fiscal year 1985 were for instruction (table 4 and figure 2). Nationally, 35.6 percent of total current expenditures were for support services and 3.6 percent were for noninstructional functions.

- Instructional expenditures ranged from a low of 52 percent of total current expenditures for Washington to a high of 72.8 percent for Kentucky.
- Support services expenditures ranged from a low of 22.1 percent of total current expenditures for Kentucky to a high of 44.6 percent for Washington.
- Noninstructional expenditures ranged from a low of 1.3 percent of total current expenditures for Nevada to a high of 7.5 percent for Louisiana.

Per pupil expenditures, by average daily attendance, ranged from a high of $5,492 in New York to a low of $2,220 in Utah (excludes Alaska). In terms of fall 1984 student membership, per pupil expenditures ranged from a high of $4,793 in New York to a low of $2,086 in Utah (excludes Alaska).

Public Elementary and Secondary School Revenues and Current Expenditures for Fiscal Year 1985: Final Tabulations, Revised

This report presents final data on public elementary and secondary school revenues, expenditures, average daily attendance, and student membership for the 1984-85 fiscal year. It includes revenues by local, State, intermediate, and Federal sources, and current expenditures by the categories of instruction, support services, and noninstructional services. Average daily attendance (ADA) and student membership are shown as reported by the State education agencies from their administrative records.

Methodology

Data on public school revenues, current expenditures, and ADA were provided through the Common Core of Data (CCD) survey, Revenues and Current Expenditures for Public Elementary and Secondary Education, Fiscal Year 1985. For purposes of this report, the fiscal year is the 12-month period beginning July 1, 1984 and ending June 30, 1985. The CCD surveys are an annual collection of basic information on the universe of public elementary and secondary schools in this country. The surveys are conducted by the Center for Education Statistics (CES) with the assistance of the State education agencies (SEAs) in the 50 States, the District of Columbia, and the outlying areas under U.S. jurisdiction. Data from the outlying areas are not included in this report, but are available upon request. The data are derived from the administrative and fiscal records in each State.

These data, due to CES on March 15, 1986 after the close of the 1985 fiscal year, were edited by the States and CES, reported in several reports and bulletins, and used to calculate allocations for Federal programs, including the Education Consolidation and Improvement Act of 1981 (ECIA) Chapter 1. Upon receiving the fiscal survey from each State, CES edits the data using a computer edit procedure to check for internal and longitudinal consistency. Questionable entries are returned to the SEA for verification or correction before publication. Revisions to the final school revenue and current expenditure data were accepted through July 1987. No further revisions to State fiscal data will be entered into the official CES files for fiscal year 1985.

Comparability

In compiling these data from fiscal and administrative record systems, each SEA obtains fiscal and attendance data from the local education agencies (LEAs) that operate public schools. Since each SEA uses various collection methodologies to obtain these

data, and States use various accounting procedures, revenues and expenditures may not be comparable among States. CES attempts to standardize State reports by defining revenue and expenditure items that should be included, by source. CES is engaged in an extensive redesign of the fiscal data collection to ensure future comparability of revenue and expenditure reports. Under Chapter 1 of the Education Consolidation and Improvement Act of 1981 (P.L. 97-35), States are to provide average daily attendance in accordance with State law; however, CES provides a definition for States to use in the absence of State law. Since some States use the CES definition and others use their State definition, the data on average daily attendance are not completely comparable across States. As a result, the expenditure per pupil in attendance figure may not be comparable.

Definitions

CES defines expenditures according to the Financial Accounting for Local and State School Systems (1980), second revision, commonly called Handbook II. The following definitions from the accounting handbook are used in this report.

Current expenditures. Current expenditures for instruction, support services, and noninstructional services include fixed charges (employee benefits, rent, interest).

Current expenditures for instruction include expenditures made for activities dealing directly with interaction between teachers and students (school classroom, home or hospital, television, radio, or telephone instruction).

Current expenditures for support services include student support services (attendance, guidance, health, speech, psychological); staff support services (improvement of instruction, educational media); general administration (board of education, central office); school administration (principal); business (fiscal services, purchasing, warehousing, printing); operation and maintenance of plant; student transportation services (excluding expenditures made to transport students at public expense); central expenditures (research, information services, data processing); and other support services (miscellaneous).

Current expenditures for noninstructional services include food services operations and other auxiliary enterprise operations (bookstore, interscholastic athletics).

Revenues. Revenues from local sources include taxes levied or assessed by an LEA; revenue from local government to the LEA; tuition received; transportation fees; earnings on investments from LEA holdings; net revenues from food services (gross receipts less gross expenditures); net revenues from student activities (gross receipts less gross expenditures); and other revenues (textbook sales, donations, property rentals).

Revenues from intermediate (county units, or agencies below State level but composed of several local units), State, and Federal sources include restricted and unrestricted grants-in-aid; revenue in lieu of taxes; and revenues from the State which are received directly by the local school district (such as teachers' retirement payments, or State

block grant funds for compensatory education purposes) rather than through the State Education Agency. Excluded are proceeds from bond sales; cash received from the sale of assets; other nonrevenue receipts (gifts); intergovernmental transfers among LEAs; and revenues from community services.

Average daily attendance is defined as attendance determined in accordance with State law. However, in the absence of State law, the Center defines average daily attendance as the aggregate days of attendance of a given school during a given reporting period, divided by the number of days in session during this period.

Student membership is the unduplicated count of students on the roll of the school or LEA, taken on the school day closest to October 1; students who withdrew from school have been removed from the count.

Acknowledgments

The author gratefully acknowledges the comments and suggestions of the reviewers, Todd Landfried of the Council of Chief State School Officers, Howard Nelson of the American Federation of Teachers, Will Myers of the National Education Association, and Donald Malec, Vance Grant, Paul Mertins, and William Sonnenberg of the Center for Education Statistics.
